

REB and Location Case Fitting Out

PRODUCT PROFILE

Henry Williams limited can provide your complete manufacturing solution for the build of Location cases and REB's.

Mechanically

Our fabrication facility focuses on the mass production of location cases and their associated rails and brackets, the same rails can be utilised in the standard form REBs

Electrical

Our electrical engineering department carry the required skills and expertise to provide a complete fit out and wiring service in accordance with Network Rails standards for signalling installation.

Testing

To complement the manufacturing cells we have IRSE licenced staff able to provide a comprehensive testing service for all signalling equipment to fulfil the requirements of the Rail Industry.
