

REB and Location Case Fitting Out

PRODUCT PROFILE

Introduction

Henry Williams Limited provide a complete solution for the manufacture and fitting out of Location cases and REB's.

Mechanical

Our location cases can be supplied in mild or stainless steel either empty or complete with stainless steel racking as detailed in drawing series BRS-SM-440.

The same racking is utilised within the REB's.

Electrical

Our strong background in the electrical fitting out of control cabinets for all industries including Rail has allowed us to provide a complete fitting out facility in accordance with the RT/E/C/11210 Network Rail Line Code of Practice Signalling Installation.

Testing

To complement the manufacturing facilities we provide comprehensive tested of all electrical equipment to fulfil the requirements of the Rail Industry, we have trained members of our manufacturing team to level 3C enabling them to perform the In House Testing function.

Approvals

- Network Rail approved
- Link-up approved
