

# Tunnel Panels

# PRODUCT PROFILE

Henry Williams Limited control systems are an integral part of our Electrical and Instrumentation business, which provides total capability in E & I design, manufacture, installation, commissioning and maintenance.

From simple manufacture through complete turnkey projects, Henry Williams experience coupled with technical expertise and manpower resources enables us to provide a comprehensive service throughout the UK.

Our Darlington works, have their own design, assembly, fabrication and test facility, accredited to BS EN ISO 9001.2000

One example of the Tunnel Panels manufactured by Henry Williams Limited are Emergency Distribution Panels in stainless steel, as shown above.

The panel construction is set to provide fire resistance for two hours and the whole panel satisfies a water test to IPX6.
